SamurAI Coding 2019-20 Final Round

March 6, 2020 at Room 221, Building 23
Ohgigaoka Campus, Kanazawa Institute of Technology

Welcome Message from Tasuku Hiraishi, Director

"Search and Dig for Treasure!"

The world final round of SamurAI Coding 2019-20, the 8th International AI Programming Contest held by IPSJ, is taken place aiming to cultivate the younger generation so that they can become leading researchers, developers and successful on global level. Contestants demonstrate and compete on their design and engineering skills of algorithms and Artificial Intelligence (AI) strategies in addition to programming skills by writing AI programs for a match-up game "SamurAI Dig Here." Among 37 submissions for the preliminary round, 16 teams have been selected for the world final. On behalf of the SamurAI Coding Committee, it is my great pleasure to welcome you to the world final. I would like to extend my sincere gratitude to committee members, numerous volunteers, the board of directors and the secretariat of IPSJ, and, last but not least, the sponsoring individuals and companies, and supporting organizations. Without their help and support, this event could have never been realized.

Tasuku Hiraishi
Director, SamurAI Coding Committee
